

## STUDENT SATISFACTION SURVEY 2020-21

Please confirm this is the first and only time you answer this survey

940 responses

Age

940 responses

Gender

940 responses

### Year of Study

940 responses

### 1. How much of the syllabus was covered in the class?

940 responses

### 2. How well did the teachers prepare for the classes?

940 responses

### 3. How well were the teachers able to communicate?

940 responses

### 4. The teacher's approach to teaching can best be described as

940 responses

### 5. Fairness of the internal evaluation process by the teachers

940 responses

6. Was your performance in assignments discussed with you?

940 responses

7. Did the institute takes active interest in promoting internship, student exchange, field visit opportunities for students?

940 responses

8. The teaching and mentoring process in your institution facilitates you in cognitive, social and emotional growth

940 responses

9. The institution provides multiple opportunities to learn and grow

940 responses

10. Teachers inform you about your expected competencies, course outcomes and programme outcomes.

940 responses

11. Your mentor does a necessary follow-up with an assigned task to you

940 responses

12. The teachers illustrate the concepts through examples and applications.

940 responses

13. The teachers identify your strengths and encourage you with providing right level of challenges.

940 responses

14. Teachers are able to identify your weaknesses and help you to overcome them.

940 responses

15. The institution makes effort to engage students in the monitoring, review and continuous quality improvement of the teaching learning process.

940 responses

16. The institute/ teachers use student centric methods, such as experiential learning, participative learning and problem solving methodologies for enhancing learning experiences.

940 responses

17. Teachers encourage you to participate in extracurricular activities.

940 responses

18. Efforts are made by the institute/ teachers to inculcate soft skills, life skills and employability skills to make you ready for the world of work.

940 responses

19. What percentage of teachers use ICT tools such as LCD projector, Multimedia, etc. while teaching.

940 responses

20. The overall quality of teaching-learning process in your institute is very good.

940 responses

21. Give three observation / suggestions to improve the overall teaching – learning experience in your institution. 246 responses

More practical approach towards examples given can be adopted

The teachers are extremely indulged, they illustrate and solve various problems in the class itself and they promote student- teacher engagement on a higher level.

Amazing faculty and learning experience

1. Duration of time table should be reduced it is very long from 8:30 to 5:00 which leads to low productivity and lack of motivation to attend classes. 2. Compulsory attendance of 75% should be reduced to 50% atleast because many students face connectivity issues and lack of accessories and have limited data. It creates huge pressure on students. 3. Classes should be more interactive

No suggestions as college is much more than what I thought of it. 100% satisfied with my college.

The teachers who are teaching in SRCC are the best in communication skills. They make us to understand all the concepts to a very greater extent The teaching method always be the best student centric.

The learning experience and the faculty is great. The teaching is inclusive and practical. So far it the best It was always my personal problem like bad network, sickness etc which are beyond their control

The learning experience in my institution is excellent, it is more than I ever expected.

No suggestions but keep on doing the same, my college is doing very well in overall teaching.

1. Hybrid system comprising online and offline classes should be followed so as to ensure best possible results. Online mode of teaching has little to moderate power of imparting knowledge. 2. Regular breaks should be provided between classes so as to allow students to copy whatever notes they missed and to let them rejuvenate for the next class. 3. Class time should not exceed 50 mins because that is the maximum concentration span on online mode and it becomes difficult thereafter.

Teachers are constrained due to their technological adaptability. But all my teachers are doing THE BEST within their constraints. The college is the best.

Please reopen college

Need to increase interaction in class Need take sessions on the development of soft skills  
Personal counselling

So far so good It is the students problems like bad network, sickness etc which are beyond the control of the institution

Observations:- •Active discussions in classes have provided a good learning experience.  
•Interactive co curricular activities and sessions have helped in overall personal growth.

Suggestions:- •Partial offline classes can improve the learning experience.

My personal viewpoint is that the teaching-learning experience at SRCC is par excellence 😊  
The teachers are really hard working & they put their heart and soul into everything they teach.. They try and make every class interesting even though it's so tough to do that in the virtual mode. Overall, it's just perfect ✨

The teachers are doing their best in every possible way. So, no suggestions.

A few teachers use this white screen method to teach and these few teachers teach very well. Teachers should understand the problem faced by students

Suggestions for improving the learning experience : 1.Offline mode for classes,so that our classroom participation increases. 2.Winter internship opportunity, live projects, access to add value courses from coursera. 3.Regular feedback on assignments.

Overall good but need physical interactive session at the college.

Lessen the length of classes and give more time to work on the self upskilling

1. According to my experience with the online classes I found that teachers are putting their best efforts to make us understand things clearly but the only hindrance is a lack of practical experience because we are devoid of labs and live examples. 2. Teachers in my college are very innovative and creative while teaching. Even without getting a chance to look at our facial expression and guessing whether we are getting things, they are able to make out whether a topic needs to be elaborated upon more & whether students are getting things. I don't find any scope of improvement except taking classes in offline mode.

1. must have good internet connection , many times teachers suffers some glitches . 2. background voice must be eliminated 3.at last ,i think teachers are giving their 100% while teaching so i don't think that i should give any suggestion in context of teaching .

#### Offline Classes

Online zoom classes are hectic and duration of classes sometimes too much to bear, offline mode is most preferable.

Already the institute is very effective in its methods of teaching and imparting Knowledge. Connecting with practical life examples to make theoretical subjects more interesting Proper setup for virtual classes to gather interest of students Use of both Hindi and English language as a medium of communication as mostly all students have a problem in understanding if a teacher continues to deliver lecture in English

- Classes can be made more interactive. - Instead of taking one internal exam, teachers can conduct regular assignments on monthly/ weekly basis by leveraging their marks and increasing student turn up in classes - Instead of teacher explaining the entire topic, teachers can let student explain their understanding of it, which will lead to more interactive sessions.

My overall experience is really very good, but our academics are suffering due to online mode of teaching. It's my request to the concerned authorities that colleges must be reopened on priority basis.

1. Encourage students to ask them questions 2. Identify and support struggling students

From best classroom experience to best college life experience, SRCC have helped me to grow, reinvent myself and build my persona. It helped me to ponder over various social issues and has evolved me to be a more responsive - both empathetically & professionally, and a culturally versed individual who loves adding values to her community.
